

Compliance Planning 01/15/20

Upcoming (critical) compliance dates and or events

1/17/20 Next OSU Hemp Advisory Committee (HAC) meeting in person in Tangent, Or

- Your Company name? Could it be something like 'Hemp Tech Genetics a subsidiary of HYBRID LLC'?
- Whom should I say I am working; Mateo is my bet for now.

1/17/20 Events

- Invited to visit Oregon CBD's new Corvallis grow facility by Alika a new Crawford hire to grow their business.
- Note: May or may not visit Oregon CBD's site for being on the HAC and seed/clone committee with Crawford's might be seen as a conflict of interests for them down the road. Any input?

1/25/20 Next OSU Essential Oil Standards sub-committee meeting

- Essential oil standard is the naming convention being employed for seed breeding standards for greenhouse and fields
- Attached: is the draft copy of the essential oil standards. Please do not outside of team until final is approved.

1/30/20 – 2/12/20 – 238 OSU site inspection. 1st of 2 OSU site inspections is possible in next 2/3 weeks

- Confirm and schedule a date for 1st OSU site visit of seed certification:
 - Mateo ready to have flowering plants pollenated (what day?)
- OSU Field Visit:
 - OSU's Rachel Hankins is my contact and will be the person visiting. She requested I get back to her ASAP so she can plan and put on her calendar (she has kids etc. and has to plan in advance)
- Experimental Application:
 - Seed team (Richard) and me (all are welcome) meet, review and prepare "OSU's Experimental seed application" for varieties. How many varieties are trying to be approved?
 - Note: I believe one male pollen donor?

1/15/20 to 1/30/20 (site prep lead time)

- Prep 238 for site visit (this is already addressed am sure)
- Am available to work alongside 238 team in preparation. Might be a good idea to have me be on the ground working with team doing any additional clean up and prep and take notes for future.
- Visiting Forrest's production facility would be a good use of time for me as well.

Those are the upcoming critical dates and events. There are other topics though these are the more pressing.
